Profile

Teaching science allows me to promote proactive, positive thinking about the future of our societies and planet. My goal is for students to have meaningful, authentic learning experiences in which they are engaged, reflective, and motivated. I am a dynamic, creative, and hands on science educator. I empower students to think independently. I lead an inquiry based classroom where I strive to build student's analytical and critical thinking skills.

Core Competencies

- Imaginative Lesson Planning
- Variety of Instructional Strategies
- Knowledge and Passion of Subject Matter
- Classroom Organization & Management
- Technology Proficient
- Inquiry Based Learning
- Assessment Techniques
- Strong Professional Ethics

Experience

- Coached middle and high school cross country

NASA ACADEMY OF PROGRAM & ENGINEERING LEADERSHIP

2005-2010

Curriculum and Knowledge Sharing Manager

- Worked as a full-time contractor for NASA to design and implement courses, forums, conferences, publications, and multimedia that provided NASA's workforce with information needed to enhance work success.
- Determined areas in which NASA program managers and engineers need development and training.
- Work with instructors to ensure training meets NASA's needs.
- Completed cycle by assessing trainees to determine quality of training, information, knowledge attained as well as their capabilities enhanced and skills applied on the job.
